

Data Management Solution DMS

- ✓ Less time processing messy data.
- ✓ More time converting insights to action.

SSG's Data Management Solution (DMS) automates data collection and cleansing for easier information management, analysis and reporting.

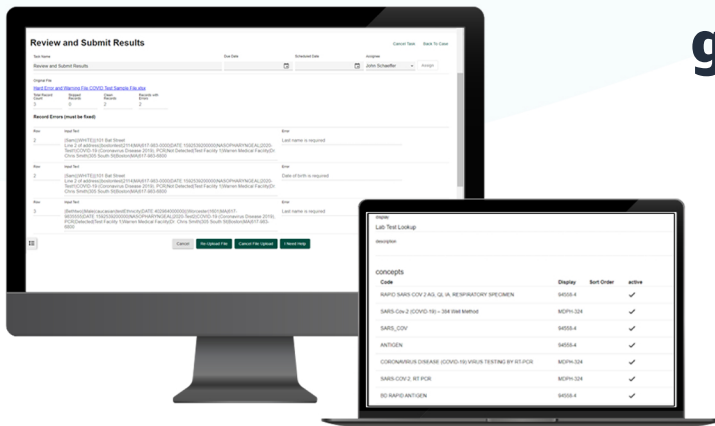

Lab result processing and vaccination record reporting is a growing burden on public health systems, with high volumes of disparate, non-standard, messy data submissions adding to the massive workload.

SSG's DMS is a flexible application that can be deployed within a matter of days for rapid go-live and immediate results.

Eliminate headaches and get actionable intelligence from your data instead

Sita Smith

• MA Department of Public Health

The pandemic highlighted our need to automate and streamline Public Health data collection.

SSG's Public Health Data Management Solution allowed us to shift resources from manual data cleansing, processing and reporting to supporting actionable analytics and higher priority public health surveillance activities.

By automating multiple processes, SSG's solution helped us manage the tremendous increase in data submitter onboarding, received data volumes and the burden of data cleansing.

Automated Data Cleansing and Validation

Standardize formats, reconcile multiple data formats, and normalize outcomes to local reporting standards

Actionable Intelligence

With usable data and exportable reports, streamline reporting and decision-making

Diverse Data Formats Supported

Data ingestion and harmonization beyond HL7 and HIE, including unstructured flat files and XLS, XLSX, CSV, TSV, JSON, XML

Secure Standards-Based APIs

Connect to any existing enterprise IT environment and with any existing system

ABOUT 

Since 2003, SSG has been on a mission to modernize public health.

Our products and services are meant to automate essential workflows in public health organizations and transform the way they manage and execute their programs, giving them additional capacity for supporting the citizens in their communities.
